# WELCOME

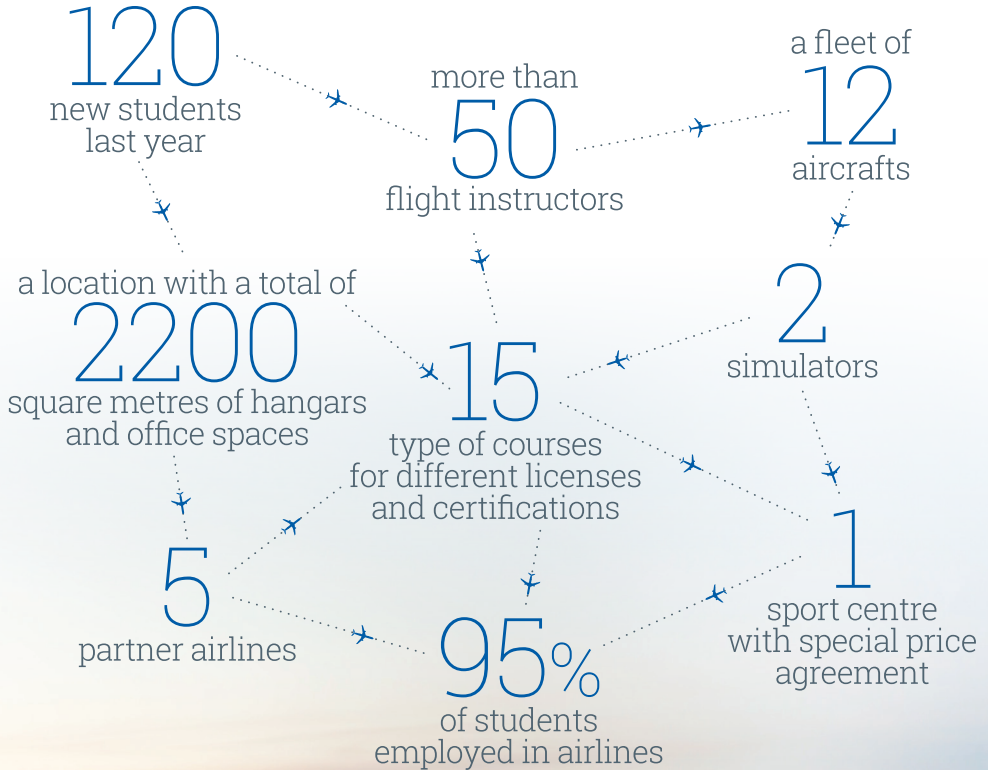

If your passion is flying, if you have strong perseverance and a great goal such as flying a Boeing 737 or starting a career in private aviation, this is the right place. Urbe Aero ATO is one of the best flight schools in Europe, with a fleet of aircraft and simulators to guarantee you a state of the art training.

**Do you want to make a difference?**

Call us and put yourself to the test.

# HIGHLIGHTS

# THE INSTRUCTORS: OUR GUIDES

We have about 50 flight instructors, most of whom airline pilots, all highly qualified and with a long-time experience in airline transportation. Our theory instructors all come from Alitalia's Alghero Sky Master Training Academy.

## A STATE OF THE ART FLEET

Urbe Aero ATO has a fleet of 12 brand new aircraft (max 5 years old), all at your disposal. Our Diamond DA20-C1, DA40NG, DA42NG, DA42-VI, CIRRUS SR 20 G-6 come all with the latest Garmin digital avionics, touch screen for DA20, integrated automatic pilot for DA40 and DA42, TAS air traffic monitoring system, StormScope and Weather Radar.

The fleet also includes two latest generation simulators specifically selected for the best possible training: a DA42 to reproduce the same conditions of the aircraft used for practice and a Mechtro-nix B-737NG for advanced multi-crew training, the same simulator used by airlines for selecting their pilots. Our hangar inside the airport is our strength for fleet maintenance. Our team of specialised technicians guarantees a safe and fast intervention so that our aircraft can have the best performance and always be available for your missions.

Urbe Aero is certified as "Continuing Airworthiness Management Organisation" (CAMO), in compliance with EASA provisions.

# COURSES, STUDIES AND PRACTICE.

Experience is paramount for flying and we work hard every day to guarantee a complete and scrupolous training. Being in Rome Urbe airport is a further advantage for practice: you will be in Rome's airport traffic, close to instrumental airports, a perfect place to learn. We have a young and dynamic environment with new classrooms, multimedia boards and computers for you to study on.

Our English course to prepare you for TEA (test of English for aviation) examination is held onsite to help you learn better the language and give you an effective preparation to write your CV. In order to monitor course performance and share all steps and progress, we use one of the most sophisticated training management software, i.e. the Flightlogger. This will be your support tool - which even your parents and airlines can access through the web - to check your class training, flight training, syllabus, flight reports, availability and book your missions.

Integrated Airline Transport Pilot Licence (ATPL)

Modular Airline Transport Pilot Licence (ATPL)

Multi Pilot Licence (MPL)

Private Pilot Licence (PPL)

Commercial Pilot Licence (CPL)

Multi Crew Coordination (MCC)

Upset Prevention and Recovery Training (UPRT)

Performance Based Navigation (PBN)

Flight Instructor (FI)

Single Engine Piston (SEP)

Multi Engine Piston (MEP)

Instrument Rating (IR)

Instrument Rating Instruction (IRI)

# OUR COMMITMENT TOWARDS YOU

Choosing the right school is important just as deciding to become a pilot. However, there is a great difference between selling flight hours and giving effective and substantial training. This is what Urbe Aero is focused on.

Our commitment and the level we have achieved has made us become one of the best flight academies in Europe. Care and responsibility towards our customers, students and instructors are our main goals. We strive for excellence and establish effective collaborations with the main airlines to seize market opportunities and make our young pilots start their career.
